WEST NILE VIRUS
ZIKA
MEASLES
YERSINIA PE
MALARIA
CHOLERA
EBOLA
LASSA FEVER
YELLOW FEVER
SARS
RIFT VALLEY FEVER

Man-made disasters:

Pandemics/infectious disease outbreaks, chemical spills, intentional acts -active shooter, Industrial action

(NB we also have natural disasters)

ORGANISATIONAL RESILIENCE IS:

- The ability to prepare for, respond and adapt with a disaster or disruption to business with minimum impact and damage to a changing environment
- Being able to ‘bounce forward’ to a new norm
- Continually learning and taking responsibility for making better decisions to improve capacity to handle hazards and disruptions
- A resilient organisation has a great awareness of itself, it’s key stakeholders and the environment within which it operates
- Resilience reaches beyond crisis & risk management towards a more holistic view of business health and success
- Being prepared
- Organisational resilience is a journey NOT a destination

Crisis Management is only one part of the puzzle

WHAT ARE SOME OF THE EFFECTS OF A PANDEMIC (COVID-19) ON A BUSINESS/ ORGANISATION?

- Reduced staffing including contractors, casual employees other
- **Inability/unavailability for supply chains to provide goods** -Customer orders/services cancelled or postponed/supply chain issues for extended periods of time possibly up to 2yrs
- Changes and demands for some services i.e. increased internet use, decreased tourism/travel
- Restriction and or reduction to public places/gatherings/schools/restaurants/churches etc.
- Reduced healthcare or homecare services due to either demand for services/isolation
- In extreme situations and dependent on extent of the pandemic there may be possible disruptions to critical services i.e. telecommunications, banking, water, power, fuel supply, medicines, food supply, other (often due to the lack of personnel available to run such services)
- Short and long term financial restraints

What have we learnt living with COVID-19?

We have learnt new words:

unprecedented, herd immunity, stick to your bubble, flattening the curve, social distancing, lockdown, remote working, zoom meetings, etc

- Having to queue at supermarkets, no takeaways
- Having to work in teams
- Changing the way we operate our business
- Flexibility, vulnerability, being innovative

**IS A PLAN FOR A
PANDEMIC
DIFFERENT FROM
A STANDARD
BUSINESS
CONTINUITY
(DISRUPTION) PLAN?**

The purpose of Business Continuity Planning is to enhance organizational resilience through the following:

Build organisational capabilities to enable and support a continuance of the critical business functions & objectives during events and incidents that compromise business as usual (within acceptable time frames)

Traditionally most BCP's will focus on what happens should buildings, equipment, products or services are damaged or compromised in some way, which are predominantly 'people focused'

In the event of an emerging infectious disease outbreak such as a pandemic, most employees may not be able to report for work, therefore as an organisation it is imperative you plan for such events to minimize the risk and harm to employees and families. Additional Public Health measures may also limit business operations

With a pandemic, business operations may be affected for extended periods of time therefore it is imperative your core business activities can be maintained for several weeks or months with a skeleton staff providing they are not at risk from harm

We have just
been informed
that as of
midnight tonight
we are going
back into level 4
for an unknown
period

In your business as HSR's:

What are the immediate actions that need to be taken?

Who are the key people that need to be notified and involved?
- internally and why
- externally and why

What lessons have we learnt from previous lockdown and what would we do differently in future events?

What are **5 key priorities** for you as HSR's within your business?

What arrangements are being made to manage workload and staff

How will information be delivered

- Internally to staff
- Externally to your clients, stakeholders, other

The “What If” plan

WORKING SAFELY TOGETHER

Response-able

Building capacity to be *ABLE* to respond

Tammy Alexander – Maugers Contracting Limited

Pre – Lock DOWN

- ***Targeted Communication***
- ***Seek advice from experts***
- ***Provide concise information***

Lock Down:

- *Open 2-way effective communication*
- *Keep informed –Live updates*
- *Ask for advice from everyone & ask how does that look to them*

Return to work:

 siteconnect

Contact Tracing

SITE CONNECT
COVID TRACER

Social distancing

1-2 METRES APART

Hygiene

WASH YOUR HANDS
WASH YOUR HANDS
WASH YOUR HANDS

Learnings:

- ✓ *responsibility*
- ✓ *Communication*
- ✓ *Crisis plan*
- ✓ *Post event evaluation*
- *Know what you need to know*
- *Consult and engage - openly and early*
- *Who needs to know - what, when, how and why*
- *What did we do well and what do we need to improve on*

RESPONSE

Am I able to respond?

What is my role, how can I
add value in a crisis?

DISCUSS

Consider potential
crisis scenarios when
discussing processes in
your workplace

CHALLENGE

REVIEW

What Processes/procedures
do we have in place and are
they effective
Are any unnecessary?

Leading through a crisis

- *Communicate - clearly, openly & regularly*
- *Be prepared to say you don't know what you don't know – but seek guidance for that and report back*
- *Look beyond yourself - BE “Response”-“ABLE”
Be able to respond (Learn what this looks like)*
- *Know your limits and when to engage expertise*

***PREPARE YOURSELF TO
MOVE INTO CRISIS MODE***

***Calmly, Capably
and Confidently.***

Learnings:

- ✓ *responsibility*
- ✓ *Communication*
- ✓ *Crisis plan*
- ✓ *Post event evaluation*
- *Know what you need to know*
- *Consult and engage - openly and early*
- *Who needs to know - what, when, how and why*
- *What did we do well and what do we need to improve on*

Next Charter event:

[Questions you were too afraid to ask...](#)

Thursday, 17th September

5.30pm-8pm

The Tannery
